

Han Peng

Address: The Queen's College, High Street, Oxford, OX1 4AW | Tel: +44(0)7818051268

Email: Han.Peng@physics.ox.ac.uk | Webpage: <https://ha-ha-ha-han.github.io/>

EDUCATION

2014 – Department of Physics, University of Oxford DPhil (PhD) Reading in Condensed Matter Physics
2010 – 2014 University of Science and Technology of China (USTC) Bachelor of Science in Applied Physics

RESEARCH

2014 – 2018 PhD Project: Study of Electronic Properties of Quantum Materials Advisor: Prof Yulin Chen
Clarendon Laboratory, Department of Physics, University of Oxford

- **Machine learning in ARPES data analysis**
Using convolutional neural network to identify the dispersive features in the spectrum images. The project is developed using MATLAB, Python and TensorFlow
- **Twisted bilayer graphene**
Using Angular Resolved Photo-Emission Spectroscopy (ARPES) with Micrometre resolution to study electronic properties of twisted bilayer graphene
- **Other contributions**
Leading the development of data analysis system for spectrum image data processing.
There are 30 users, 4 regular contributors and 10 interns throughout the years. The work includes algorithm optimisation, data visualisation and graphic user interface building

2017 Summer Research Intern: Neuron Image Registration Advisor: Prof Kenneth Harris
Cortical Processing Laboratory, University College London

- Designed algorithm to register ex-vivo 2D-slices with in-vivo 3D-zstacks of neuronal images with different modality and detection methods
- Developed semi-automatic MATLAB data analysis pipeline for registering 130 2D-slices with 2 z-stacks neuroimaging data sets. The pipeline includes data I/O, cell detection, registration, result visualisation and manual modification interface. Project GitHub page: <https://git.io/vAjk4>

2013 Research Intern: Study of Jamming Transition in Soft Materials Advisor: Prof Ning Xu
Computational and Theoretical Soft Condensed Matter Physics Laboratory, USTC

- Computationally studied the power law phenomenon in the Jamming transition of a particle system
- Analysed the performance of energy minimization algorithm in different energy potential field

COMPUTING SKILLS AND COURSES

Programming tools: MATLAB, Python, TensorFlow

Open Course: Machine Learning by Andrew Ng, CS231n by Feifei Li

Summer School: Medical Imaging Computing Summer School 2017, University College London

TEACHING

2017 – 2018 Tutor in **Mechanics**, Jesus College, University of Oxford

2016 – 2017 Tutor in **Condensed Matter Physics**, Hertford College, University of Oxford

2015 – Demonstrator (Senior Demonstrator since 2017) in **Computational Physics**, University of Oxford

AWARDS AND FUNDING

2014 – 2018 Oxford University – China Scholarship Council Scholarship, full scholarship for PhD study

2015 Arthur H. Cooke Memorial Prize awarded by Department of Physics, University of Oxford

2011 National Endeavours Scholarship awarded by Ministry of Education of China

TALKS AND PRESENTATIONS

2018.03 **Van hove singularity evolution with twist angle in twisted bilayer graphene**

APS March meeting 2018, Los Angeles, CA, US

2017.11 **Register 2D neuron image with 3D**

Neuromics project annual retreat, Washington D.C, US
